## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- i. Group I, claim(s) 1-2, drawn to chromatic coloring agent.
  - ii. Group II, claim(s) 3-9, drawn to composition comprising chromatic coloring agent.
  - iii. Group III, claim(s) 10-13, drawn to molded article comprising the composition.
  - iv. Group IV, claim(s) 14-16, drawn to laser marking method.
  - v. Group V, claim(s) 17-19, drawn to multicolor-marked molded article.
- 
2. The inventions listed as Groups I to V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The technical features that are common to groups I to V include chromatic coloring agent. This feature is taught by the prior art of US 2002/0052438 A1. Specifically, attention is drawn to thermoplastic resin composition for laser marking capable of developing chromatic colors containing thermoplastic resin, at least one black system and a dye or organic pigment (abstract). Concrete examples include phthalocyanine blue (paragraph 0065) and reads on the chromatic coloring agent. Given that phthalocyanine backbone (i.e. a chromatic coloring agent) is recited in the present claim 5 as having an exothermic peak

Art Unit: 1796

of 360<sup>0</sup>C to 590<sup>0</sup>C, it is the examiner's position that phthalocyanine blue of prior art inherently possesses the presently claimed exothermic peak. Case law holds that a material and its properties are inseparable. See *In re Spada*, 911 F.2d 705,709, 15 USPQ2d 1655, 1658 (Fed. Cir. 1990). Therefore, since the common technical feature of claims belonging to groups I to V fails to define a contribution over US 2002/0052438 A1, the common technical feature does not amount to a special technical feature and hence there is lack of unity between the cited groups.

3. A telephone call was made to John Knebel on 5/29/2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
